Laboratory Receives Seal of Excellence

FRESNO, CALIFORNIA – FEBRUARY 6, 2009. For the fourth year in a row, BSK Associates has achieved the Seal of Excellence Award from the American Council of Independent Laboratories (ACIL) for 2008-2009. ACIL, as a third party organization, recognizes laboratories that successfully demonstrate greater than 90% accuracy ratings on performance testing studies conducted during a twelve month period; they also consider annual ethics training and above-average response ratings for customer service satisfaction and timeliness.

“This award is a true testament to BSK’s on-going commitment to quality and service. We are proud to retain this designation as a compliment to our State and National accreditations,” stated Brad Meadows, Vice President of Laboratories.

BSK Associates was founded in 1966 and has grown to five locations in California. The Analytical laboratories, in Fresno and Sacramento, employ 75 technical and administrative staff and conducts water and soil analysis for communities and industry clients throughout California and the western United States.

BSK Associates is an employee-owned, professional consulting firm that offers civil and geotechnical engineering, environmental assessment and remediation engineering, analytical chemistry, food microbiology, hydrogeology, seismic hazards and engineering-geology, and construction materials testing and inspection services.
