## **FOR IMMEDIATE RELEASE**

# **BSK Awarded FYI Airport Taxiway Project, Funded by ARRA**

FRESNO, CALIFORNIA – JULY 1, 2009

The City's Fresno Yosemite International Airport will begin a \$2.75 million taxiway reconstruction project later this month. Funding for the project was made possible by an American Recovery and Reinvestment Act (ARRA) grant administered by the Federal Aviation Administration. BSK Associates of Fresno will serve as the City's Quality Assurance Testing Laboratory for the project, which includes demolishing existing Taxiways B9, B10 and C10, and reconstructing Taxiways B10 and C10.

"The project site has a construction schedule that will allow for continued operation of flights without completely closing the runways and taxiways. BSK will work closely with the contractor to comply with this schedule," said BSK materials engineer, Dr. Raghubar Shrestha, P.E., Granite Construction is the general contractor for this project.

### **About BSK Associates:**

BSK Associates, with operations in Fresno, Visalia, Bakersfield, Pleasanton, and Sacramento, is an employee-owned, professional consulting and testing firm that offers civil and geotechnical engineering, environmental engineering, forensic engineering, materials testing and special inspection, hydrogeology, engineering-geology, analytical chemistry, and food microbiology. Founded in 1966, BSK Associates has grown to a staff of more than 200, and has received regional and national awards for outstanding projects, business operations, and family friendly practices.
